

I am an infectious disease modeler and biostatistician using mathematics and statistics to study the evolution and transmission dynamics of infectious diseases with the aim of informing the design of more effective control interventions in public health. I am particularly interested in understanding heterogeneity in infectious disease dynamics and informing trial design using individual based stochastic models and (Bayesian) spatial statistics.

Education	Ph.D., Epidemiology and Biostatistics (Summa cum Laude), December 2013 <i>University of Basel and Swiss and Tropical Public Health Institute, Basel, Switzerland</i> Dissertation topic: “Bayesian spatial models applied to malaria epidemiology”	
	M.Sc., Mathematical Engineering , July 2008 <i>Polytechnic University of Milan, Milan, Italy</i> Dissertation topic: “Bayesian first order autoregressive latent variable models for multiple binary sequences”	
	B.Eng., Mathematical Engineering , March 2005 <i>Polytechnic University of Milan, Milan, Italy</i>	
	Assistant professor (tenured)	May 2021 – present
	Radboudumc, Radboud University Medical Center, Nijmegen, Netherlands. Research: Infectious disease modelling and biostatistics. Consultancy: Bayesian design and analysis of survey and clinical trials.	
	Research fellow	October 2017 – April 2021
	Erasmus MC, University Medical Center Rotterdam, Rotterdam, Netherlands. Research: Mathematical modelling of malaria, HIV and neglected tropical diseases with a focus on diagnostics. Consultancy: Statistical methods, geospatial analyses.	
	Post-Doc	October 2014 – September 2017
	Stockholm University, Stockholm, Sweden and Karolinska University Hospital, Stockholm, Sweden and Los Alamos National Laboratory, Los Alamos, NM, US, Theoretical Biology division. Research: i) Estimating HIV time of infection with multiple biomarkers. ii) Improved national incidence estimation and derivation of HIV-infected people unaware of their infection status iii) Integration of phylogenetic data to better understand transmission networks in the HIV epidemic.	
	Scientific Collaborator	November 2013 – October 2014
Work experience	Swiss Tropical and Public Health Institute, Basel, Switzerland and University of Basel, Basel, Switzerland. Research: Statistical methodologies for the analysis of spatio-temporal epidemiological survey and surveillance data, mapping and statistical modelling for malaria in sub-Saharan Africa. Time series analysis and forecasting. Consultancy: Epidemiological study design, assistance in statistical implementation and evaluation, spatial visualization, and GIS for epidemiological studies within the institute and its collaborative programmes.	
	Biostatistician	September 2008 – October 2009
	Fundació SIDA i Societat (CEEISCAT), Barcelona, Spain Statistical modelling, analyses and data management for projects focused on HIV/AIDS and STIs epidemiology and control among high risk groups in Guatemala.	
	Research assistant	July 2007 - December 2007
	Pontifical Catholic University of Chile, Santiago de Chile, Chile Research on Bayesian statistical models for longitudinal data on bladder cancer reoccurrence	

Funding & awards	TIMERA - Training Initiative for Modeling Epidemic Response in Africa EDCTP ,	400,000 €	2026
	Surveillance4NL - United4Surveillance - EU4Health Programme (EU4H), project ID 101102070 (consortium member, WP on automated surveillance in hospitals using federated communities and learning techniques)		2026
	UNITY: Integrating health and social impact into policy and practice. (consortium member, Vulnerabilities WP), ZonMw, Dutch Research Council	2M (total)	2025
	“Informing the design of transmission-blocking malaria interventions via mathematical modelling”, Radboud Center for infectious diseases , Radboudumc, Nijmegen	10,000 €	2024
	“EQUalS: Mathematical modelling to inform an EQUitable and effective response to EpidemicS”, ZonMw, Dutch Research Council .	250,000 €	2023
	“Risk of invasive pneumococcal disease in adults”, Radboud Center for infectious diseases , Radboudumc, Nijmegen	10,000 €	2023
	“SchiSTOP: Beyond mass drug administration: understanding Schistosomiasis dynamics to STOP transmission”. Marie Skłodowska-Curie Individual Fellowship , Horizon2020 EU	175,000 €	2021
	“Technical feasibility of sensitive POC-CAA RDT in whole blood and urine to support elimination of Schistosomiasis”. Bill&Melinda Gates Foundation with Foundation for Innovative New Diagnostics.	40,000 €	2019
	“Towards elimination of schistosomiasis: mathematical models and statistical methods to explore novel control interventions” Horizon LEaDing Fellows Postdocs Programme	95,000 €	2019
	Travel award to attend the workshop on Statistical network science, Eindhoven (NL)	1,500 €	2017
	Travel award to attend the Summer school on infectious disease dynamics, University of Washington, Seattle (US)	2,300 €	2016
	Copernicus Masters Ideas Challenge Winner 2013 with the project “Eye on malaria: Africa-wide monitoring of environmental suitability for malaria transmission” with Dr. Jonas Franke	30,000 €	2013
	Travel award to present at Statistical Modelling for Biological and Environmental Systems, Venice (IT)	1,700 €	2011
Teaching experience	Master thesis award - funded by Politecnico di Milano (IT), 2007: Fellowship and travel award Universidad Ponticia Católica de Chile	5,000 €	2007
	Erasmus Student exchange program scholarship, Universidad Autónoma de Madrid (ES)	2,340 €	2006
	Introduction to Bayesian thinking <i>Developer and instructor, Post-academic course. Radboud University medical center, Nijmegen, Netherlands</i>		2024 - present
	Modelling infectious diseases outbreaks		2023 - present

Course developer and instructor, Master in Epidemiology, Radboud University medical center, Nijmegen, Netherlands

Basic statistics with R **2022 - present**
Main instructor, Master in molecular mechanisms of diseases, Radboud University medical center, Nijmegen, Netherlands

Statistics for clinical researchers **2021 - present**
Instructor, Radboud University medical center, Nijmegen, Netherlands

Introduction to Bayesian Biostatistics **Summer 2020**
Instructor with E. Lesaffre. Erasmus Summer Programme. NIHES Erasmus MC, University Medical Center Rotterdam, Rotterdam, Netherlands

Biostatistics **Fall term 2018**
Course material developer, teaching assistant. Master programme NIHES Erasmus MC, University Medical Center Rotterdam, Rotterdam, Netherlands

Bayesian Methods for Data Analysis **March 2018**
Main instructor. PhD programme in Mathematics and Mathematical Statistics Makerere University, Kampala, Uganda.

Geographic Information Systems in Health System Strengthening **May 2017**
Main instructor. GIS training for the Association for Reproductive and Family Health and national TB control program (Global Fund TB project). Lagos, Nigeria for The Royal Tropical Institute, Amsterdam

Statistics for epidemic models **Spring term 2017**
Main instructor. MSc in mathematical statistics Stockholm University, Stockholm, Sweden

Categorical data analysis **Spring term 2015 and 2016**
Teaching assistant. MSc in mathematical statistics Stockholm University, Stockholm, Sweden

Statistics II **November 2015**
Main instructor. MSc in Mathematics (Center International de Mathématiques Pures et Appliquées). Royal University of Phnom Penh, Phnom Penh, Cambodia

Bayesian biostatistics **Fall term 2015**
Main instructor. MSc in mathematical statistics Stockholm University, Stockholm, Sweden

Spatial statistics for malaria epidemiology **January 2013**
Main instructor. Training for the national malaria control programs (Mozambique, South-Africa, Sudan) within the MALAREO project (Earth Observation in Malaria Vector Control and Management). University of KwaZulu-Natal, Durban, South Africa

ArcGIS tutorial **June 2011**
Main instructor. MSc parasitology and National Malaria control program in Senegal Cheick Anta Diop University, Dakar, Senegal

Biostatistics I **Fall term 2009-2014**
Teaching assistant. MSc in Infection Biology/Epidemiology University of Basel, Basel, Switzerland

Biostatistics II **Spring term 2009-2014**
Teaching assistant. MSc in Infection Biology/Epidemiology University of Basel, Basel, Switzerland

Fundamentals of statistics **January 2010-2014**
Main instructor. Health Care and Management in Tropical Countries programme University of Basel, Basel, Switzerland
